Unbound Surgery

A Next Generation Surgical Textbook

Gretchen Purcell & Theodore Pappas

Overview

Unbound Surgery is an electronic surgical textbook encoded in XML and designed to serve as both a comprehensive medical resource and a question-answering tool. Unbound Surgery is delivered through the CogniQ platform (Unbound Medicine, Inc., Charlottesville, VA), which integrates text, images, and videos with searches of the MEDLINE database.

Technologies Used

- Handheld computers
- XML
- Internet
